

## ENVIRONMENTAL POLICY

**ODE FOODS** has developed an Environmental Management System according to the requirements of ISO 14001:2015. ODE FOODS has identified its obligations and responsibilities against the environment and humanity and is committed to:

- continuously improve its environmental performance,
- comply with the environmental legislation and regulations,
- support the achievement of the relevant Goals for Sustainable Development of the United Nations to the year 2030.

- comply to all the requirements applicable to its licenses and operation

With the development of its Environmental Management System the company identified all the environmental parameters related to its operation and has developed procedures and plans aiming to the continuous improvement of its environmental performance.

ODE FOODS environmental policy focuses to:

- save energy and resources by developing and implementing a monitoring system for the consumption of natural resources
- manage the solid waste produced by its operation and prioritize separation at source collection and recycling.
- keep management and personnel up to date on environmental issues

This Environmental Policy is made public and is communicated, implemented and supported by every member of the company.
